Business Sales Performance Report

Dataset: product_sales_dataset_final.csv

Prepared with Python · pandas · matplotlib · ReportLab

$142.4M	$31.5M	22.2%	200,000
Total Revenue	Total Profit	Profit Margin	Total Orders

1. Executive Summary

This report presents a comprehensive sales performance analysis based on **200,000** transactions. The business generated total revenue of **$142,407,745** with a profit of **$31,548,608**, yielding a profit margin of **22.2%**.

- Total transactions analysed: 200,000
- Gross Revenue: $142,407,745
- Net Profit: $31,548,608
- Profit Margin: 22.2%
- Date range covered: 2023-01-01 to 2024-12-31

2. Revenue Trend Analysis

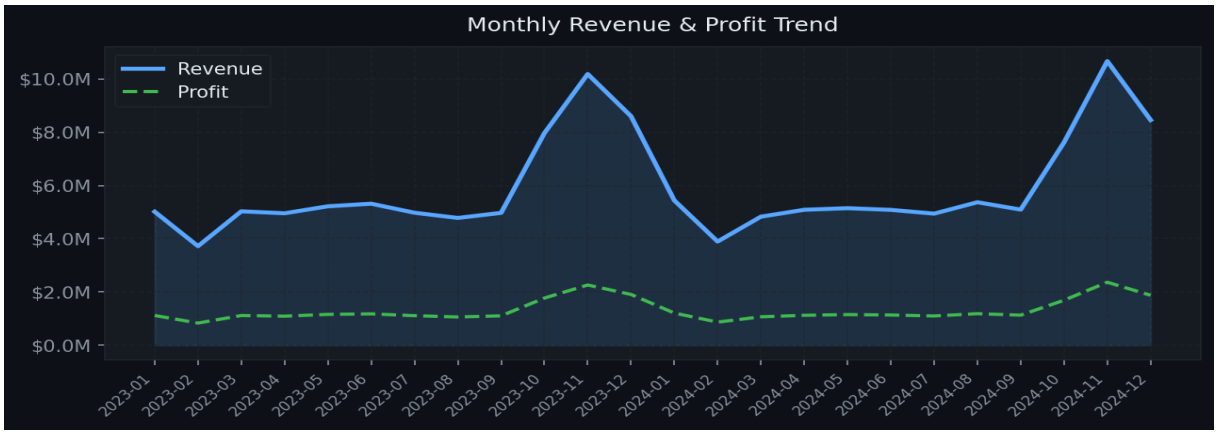

Figure 1 – Monthly Revenue & Profit Trend

Peak revenue was recorded in **2024-11** at **$10,675,098**. Seasonal patterns visible in the trend can guide inventory and marketing planning.

3. Category Performance

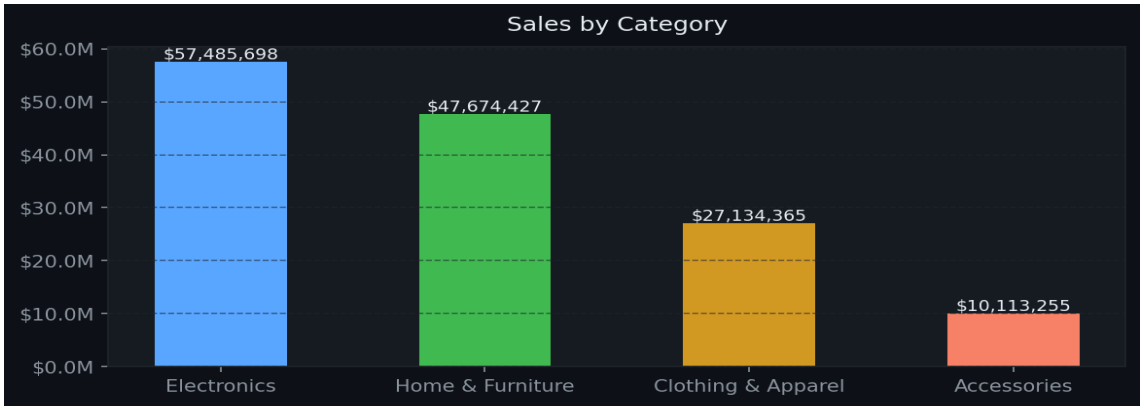

Figure 2 – Sales by Category

Category	Sales ($)	Profit ($)	Margin (%)
Electronics	$57,485,698	$8,065,114	14.0%

Home & Furniture	$47,674,427	$11,218,596	23.5%
Clothing & Apparel	$27,134,365	$8,826,851	32.5%
Accessories	$10,113,255	$3,438,046	34.0%

4. Top-Performing Products

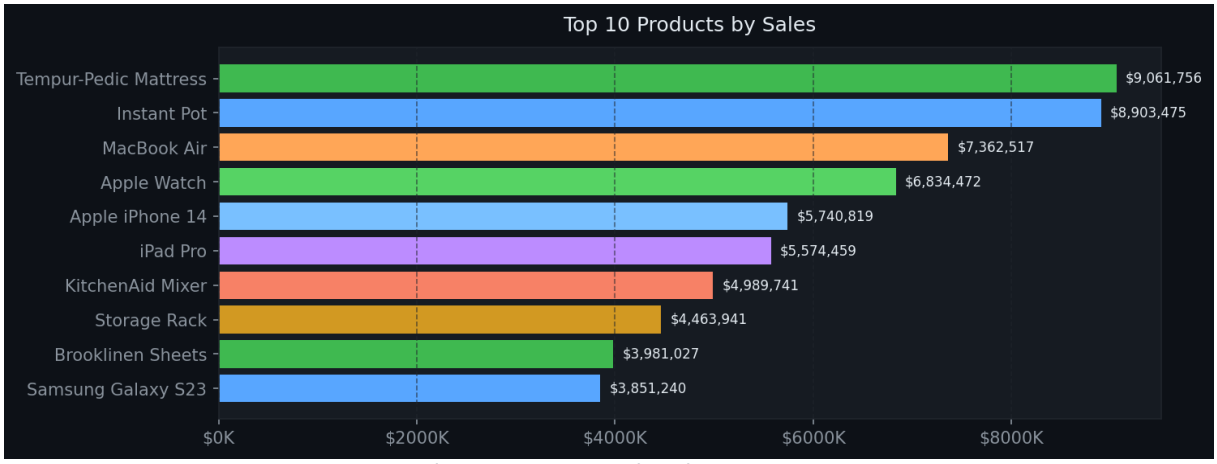

Figure 3 – Top 10 Products by Revenue

5. Regional Performance

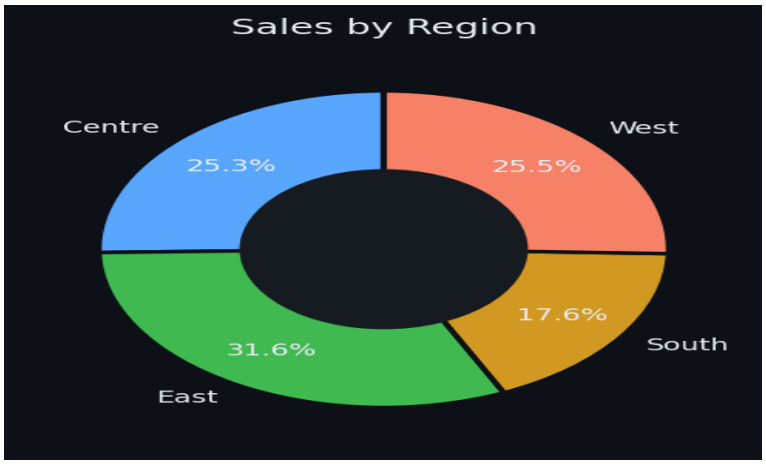

Figure 4 – Sales by Region

The strongest region is **East** with total sales of **$44,980,048**. Regional gaps present opportunities to replicate high-performing strategies.

6. Business Recommendations

1. Double down on **Accessories** — it delivers the highest profit margin. Increase inventory and marketing investment here.

2. Expand the **Tempur-Pedic Mattress** product line — it is the top revenue driver. Consider bundling or upselling strategies around it.

3. Investigate underperformance in the **South** region. Run targeted promotions or assess distribution challenges.

4. Introduce seasonal promotions aligned with monthly peak periods to maintain revenue during slow months.

5. Review SKUs with high sales but low margins — reduce costs or discontinue if margins cannot be improved.

6. Strengthen retention with loyalty programmes for top-spending customer segments.

7. Conclusion

This analysis of 200,000 transactions confirms a business generating $142,407,745 in revenue at a 22.2% profit margin. Clear opportunities exist through targeted category investment, regional expansion, and product-level optimisation. Implementing the recommendations above can drive meaningful improvement in both top-line growth and margin in the coming quarters.
